Table 1. Frequency distribution of the 19 CAICS cause codes.

Code	Cause	Layer	*n*	Frequency (%)
M1	On-site supervision	Management	283	94.3
M2	Hazard inspection	Management	258	86.0
M3	Safety training	Management	215	71.7
M4	Rules/procedures	Management	208	69.3
M5	Market compliance	Management	144	48.0
F2	Support stability	Defense	159	53.0
F3	Safety devices	Defense	58	19.3
F4	PPE use	Defense	53	17.7
F1	Edge/opening protection	Defense	26	8.7
T2	Material state	Trigger	95	31.7
T1	Equipment failure	Trigger	89	29.7
T3	Geological anomaly	Trigger	40	13.3
T4	Weather/hydrology	Trigger	22	7.3
H1	Procedure violation	Human	290	96.7
H3	Risk identification	Human	214	71.3
H2	Command decision	Human	168	56.0
H4	Emergency response	Human	21	7.0
C1	Rescue response	Consequence	8	2.7
C2	Information reporting	Consequence	4	1.3

Note: *n* = number of accidents in which the code was identified (*N* = 300). There are 2,355 code assignments in total (mean 7.85 per accident).
